

Way Companies - Proven HVAC Solutions Across Industries

Industrial Petrochemical Facility

Background

An industrial petrochemical facility operates around the clock, with critical HVAC systems supporting production safety, process control, and environmental compliance. Even minor temperature fluctuations or equipment downtime can halt operations and cause costly interruptions.

45 %

reduction in downtime

<2HR

emergency response time

Single Predictable Monthly Cost

CHALLENGES

The facility's previous maintenance provider offered scheduled service but failed to deliver reliable response times and proactive system management. Repeated breakdowns during production runs resulted in unplanned shutdowns, rising repair expenses, and lack of understanding of complex mechanical and control systems.

SOLUTIONS

Way Companies implemented a Full Coverage Maintenance Agreement tailored for industrial operations. Our team established dedicated account management with industrial-trained technicians, proactive PM scheduling, 24/7 emergency response with under two hour response times, and comprehensive cost coverage with one predictable monthly bill.

Full Coverage Maintenance

Preventative Maintenance Programs

Capital Planning & Asset Management

BENEFITS

- Reduced downtime by 45 %
- Predictable maintenance costs
- improved safety compliance
- confidence in system uptime during critical production cycles
